

rcldcpp::Node

```
classDiagram
    class rclcpp_Node["rclcpp::Node"]
    class ImuKalmanNode
    ImuKalmanNode --|> rclcpp_Node
```

The diagram illustrates an inheritance relationship. At the top is a class box for `rclcpp::Node`, which is divided into three horizontal sections: the top section contains the class name, and the two bottom sections are empty. Below it is a class box for `ImuKalmanNode`, also divided into three horizontal sections. The top section contains the class name, the middle section is empty, and the bottom section contains the constructor `+ ImuKalmanNode()`. A blue arrow with an open triangular head points from the top of the `ImuKalmanNode` box to the bottom of the `rclcpp::Node` box, indicating that `ImuKalmanNode` inherits from `rclcpp::Node`.

ImuKalmanNode

+ ImuKalmanNode()
